

Telekatessen to add flavor to your life

Francesca Rosella, David Slocombe, Livia Sunesson, Magnus Torstensson +
faculty Jan-Christoph Zoels, Tony Dunne, Fiona Raby.

Impressed by the pride the local Italian community takes in their culinary traditions, four students designed Telekatessen, a service for the digital connoisseur that transforms the mobile message into an exquisite and tasteful gift of chocolate or other special food.

Imagine receiving a message on your mobile phone telling you that somebody you love has arranged for you to collect a surprise at a local pasticceria. When you show the message to the shop attendant, she hands you a beautiful chocolate with a sweet message from your friend crafted on it.
